CROWDSTRIKE
TRUEFORT FORTRESS XDR™
APPLICATION VISIBILITY & PROTECTION

CHALLENGES:

Applications are the lifeblood of business. And to secure business you need comprehensive application visibility, control and protection.

Yet today's cloud workload protection solutions don't deliver on application security because they don't understand applications. And they use static, configuration-based policy that misses anomalies and execution events and are difficult to operationalize and maintain.

SOLUTION:

The TrueFort Fortress XDR platform extends the power of the CrowdStrike® investment you've already made and deployed. With TrueFort you get full-stack, cloud workload protection and application detection and response from the native application context.

USE CASES / BUSINESS VALUE:

- Gain application visibility and visualization
- Stop zero-day attacks
- Augment threat hunting
- Accelerate incidence response
- Support compliance and reduce risk

KEY TAKE-AWAYS

- Get more from CrowdStrike
- Cloud workload protection
- Application detection & response
- Application behavioral analytics
- Application dependency mapping
- Anomaly detection
- Policy automation
- 7-tuple telemetry
- Historical playback

KEY CAPABILITIES:

Use our agent, or bring your own. Our unique application XDR approach means that our behavioral analytics engine uses telemetry from our Fortified ecosystem to build a comprehensive view into the application layer. It also means that our customers benefit from rapid implementation and the shortest time-to-value by using the agents/sensors they already own and have operationalized from popular platforms, like CrowdStrike Falcon®.

ABOUT TRUEFORT

TrueFort™ helps IT connect business security policy with operational reality. Fortress XDR™ is the industry's first application detection and response platform unifying cloud workload protection and AppSec in a single console. Using real-time telemetry, patented advanced behavioral analytics and policy automation, enterprises can now visualize, microsegment, protect, hunt and investigate from the application layer. Founded in 2015 by former Wall Street senior IT executives, TrueFort offers unparalleled application visibility, control and protection with the shortest time-to-value via the TrueFort Fortified™ ecosystem and a unique bring-your-own-agent approach. For more information visit www.truefort.com and follow us on Twitter and LinkedIn.

ABOUT CROWDSTRIKE

CrowdStrike® Inc. (Nasdaq: CRWD), a global cybersecurity leader, is redefining security for the cloud era with an endpoint protection platform built from the ground up to stop breaches. The CrowdStrike Falcon® platform's single lightweight-agent architecture leverages cloud-scale artificial intelligence (AI) and offers real-time protection and visibility across the enterprise, preventing attacks on endpoints on or off the network. Powered by the proprietary CrowdStrike Threat Graph®, CrowdStrike Falcon correlates over two trillion endpoint-related events per week in real time from across the globe, fueling one of the world's most advanced data platforms for security.

With CrowdStrike, customers benefit from better protection, better performance and immediate time-to-value delivered by the cloud-native Falcon platform.

There's only one thing to remember about CrowdStrike: **We stop breaches.**
