Industry-first platform unlocks the unparalleled insight, control, and protection needed to secure what matters most

ARE YOUR BUSINESS-CRITICAL APPLICATIONS SECURE?

Each year enterprise IT and security organizations spend millions trying to effectively manage and secure their applications and data. Yet breaches still succeed from evasive attacks and insider threats.

And when asked, most security teams can’t answer basic questions:

1. Are your applications a target, vulnerable, under attack or already compromised?
2. Do you know where your apps are running and is your CMDB accurate?
3. Does your security policy align with your business operational policy and could you deliver a GDPR notice within just 72 hours?

Today, most organizations go to a collection of tools and siloed teams in attempt to close these gaps. They scan code, secure workload connections and reverse-engineer the app-map using ‘app-centric’ solutions they’ve implemented. And even when a war room is assembled, it is impeded through volumes of disconnected data.

So, many tools and agent-installations later, organizations still fail to secure their apps and answer rudimentary questions.

FORTRESS SECURES APPLICATIONS & THEIR CLOUD WORKLOADS

We can help. Fortress protects enterprise applications everywhere – whether on-premises or in the Cloud. It helps you fully visualize and understand them in-production – their dynamic behavior and context across all aspects including code, infrastructure, connections, configuration and the time and identities of access and attack.
NEW IN 3.X

Version 3.x introduces our new platform approach and the following features:

- Secure containerized applications via Kubernetes and the Istio standard
  Deploy the TrueFort Protect agent as a DaemonSet to a Kubernetes node to continuously collect telemetry, visualize, monitor and secure orchestrated environments.
- Forensics-on-the-fly with the new Reporter module
  Deploy appliances dedicated to storing and managing the same level of breadth, depth and DVR-playback across weeks, months or even years – to dashboard, report, conduct investigations or serve up evidentiary support on-demand.
- Secure apps on legacy hosts
  Version 3.x extends support for applications running on older systems, including Microsoft Windows® 2003.
**PLATFORM**

The TrueFort Fortress platform employs the standard appliance-sensor model and is designed for enterprise-grade flexibility in deployment and modularity.

**Platform appliance.** Delivered as software to be deployed anywhere Linux goes including baremetal, virtual machines and cloud images. It is fully multi-tenant, scalable and highly available with a load-balancing, N+1 clustering option.

**Reporter Module.** (Optional) Featuring out-of-box preconfigured reports, ideal for analysts conducting investigations or executives reviewing results.

**Management console.** Deploy, configure, protect, report and investigate all from a single pane of glass that offers configurable, role-based management.

**Protect agent.** (Optional) Our advanced, proprietary agent offers a light footprint and tracks over 115 parameters to continuously monitor, microsegment and protect. Compatible with legacy servers, virtual machines, cloud instances, PaaS and containerized environments, TrueFort Protect goes anywhere your apps go.

**SPECIFICATIONS**

The below minimum configuration details are subject to change. Your configuration depends on your unique environment and requirements. For more information, please consult our documentation or sales@truefort.com

---

**PLATFORM APPLIANCE**

- Dual Intel® Xeon® E5-2687W v4 3GHz
- 12 cores
- 8x 16GB RDIMM@128 GB
- 7X 50GB SSD
- 6Gbps 2.5" @ 1 drive/partition each

**REPORTER APPLIANCE** (Optional)

- Intel® Xeon® CPU E5-2663 v3 @ 2.80GHz
- 8 Cores
- 96GB RAM
- 50GB SSD

**PROTECT AGENT** (Optional)

- Windows
  - Java: 350MB
  - Go: 100MB
  - Linux: 100MB

- RedHat® RHEL 7.2 +
- CentOS 7.2 +

**WEB CONSOLE**

- Google Chrome®
- Mozilla Firefox™

**SOFTWARE**

- Kubernetes & Istio
- Microsoft® Windows® Server 2003 +
- Ubuntu® 16 +
- SUSE® 11 +
- RedHat RHEL & CentOS 6 +
- Oracle Linux 6+

**STORAGE**
**TRUEFORT FORTIFIED ECOSYSTEM**

*Good data in, good data out.* Power Fortress with telemetry you already collect, and let our platform fortify the value of security and operational investments you’ve already made.

Our partnerships span network security, infrastructure and endpoint protection, detection and response vendors so that you can immediately benefit from our bring-your-own-agent option.

We work also with industry standards and organizations, and open access to our fully REST-API driven platform to partners, providers and our customers through our program.

---

**SUPPORT**

Companies offering highly available solutions to protect your business need to be highly available, too. TrueFort customers automatically receive 24x7 phone and email support, and all maintenance and software upgrades.

**AVAILABILITY**

TrueFort Fortress is offered globally as a software subscription. It is licensed per endpoint, workload or containerized environment, and whether you choose our TrueFort Protect agent and/or bring-your-own.

**Contact us and let us prove it.** Request a briefing and a demo. Then experience it for yourself with a proof-of-value.

**ABOUT TRUEFORT**

Applications are the lifeblood of business. TrueFort™ helps organizations align application security policy with operational reality via Fortress, the industry’s first application detection and response platform. Fortress reverses the traditional infrastructure approach to security by comprehensively tracking application behavior to unify cloud workload protection and AppSec in a single console. Using real-time telemetry, patented advanced behavioral analytics and policy automation, enterprises can now visualize, microsegment, protect, hunt and investigate from the application layer. Founded in 2015 by former Wall Street senior IT executives, TrueFort offers unparalleled application visibility, control and protection with the shortest time-to-value through the TrueFort Fortified™ ecosystem and our unique bring-your-own-agent approach. For more information visit [www.truefort.com](http://www.truefort.com) and follow us on [Twitter](https://twitter.com) and [LinkedIn](https://www.linkedin.com).
