TrueFort® Platform: Strengthening HIPAA Compliance

Offering an integral solution for bolstering HIPAA compliance, the TrueFort® Platform aligns with HIPAA requirements to fortify the protection of healthcare information.

The complex regulatory landscape in the healthcare industry requires robust solutions for maintaining compliance. With the Health Insurance Portability and Accountability Act (HIPAA) at the forefront, the TrueFort Platform offers a comprehensive approach that fortifies HIPAA compliance – enhancing security and providing a safe harbor in the ever-turbulent sea of healthcare data regulation.

Comprehensive Visibility and Control

▶ **The TrueFort Platform: Mapping Uncharted Territory for HIPAA Compliance**

Real-Time Monitoring and Analytics: By offering a bird's-eye view of all activities within the HIPAA-compliant environment, TrueFort enables real-time insights and analytics. This helps organizations to identify and react to potential non-compliance before it becomes a liability.

Granular Control: Achieve unparalleled control over applications, access, and data flow. TrueFort's microsegmentation policies are the linchpins of an environment in which only authorized entities have access.

"I've never seen the noise of a cloud environment so clearly translated."

Cloud Network Eng, Manufacturing Org.

▶ Over the past **12 months**, the average number of medical records breached each month is **6,104,761**, and the median is **5,889,562** records.
(HIPPA)

▶ Healthcare firms reported **145 major data breaches** in the first three months of 2023, with 707 incidents in 2022 in which **51.9 million records** were stolen.
(OCR)

▶ **Risk Mitigation**

Behavior Analytics: TrueFort's intelligent behavior analytics builds an understanding of typical behavior, creating a benchmark of approved and expected activity, thereby recognizing and mitigating suspicious activity.

File Integrity Monitoring (FIM): Utilize FIM to automatically identify alterations to files, whether such changes stem from malware infections, encrypted data manipulations, or attackers attempting to conceal their activities as they navigate through the system.

Lock Things Down: HIPAA calls for a least-privilege access methodology, and TrueFort offers zero trust best practices with network and application segmentation on a granular level, including the behavior of service accounts.

▶ **Integration and Collaboration**

Flexible Integration Options: TrueFort offers diverse integration options with existing security agents and platforms, providing smooth and streamlined functionalities without the need to overhaul existing systems.

Cross-Platform Support: Ensure that HIPAA compliance is maintained across various operating systems and platforms - within the data center or in the cloud.

Shared Security Model: TrueFort cultivates an understanding and appreciation of security best practices among technical and non-technical staff, fostering a culture supporting HIPAA compliance across the whole organization.

Continuous Improvement: A Step Ahead

▶ **The Future of HIPAA Compliance**

Adaptive Learning Algorithms: The TrueFort Platform stays abreast of the evolving threat landscape through continuous monitoring and learning. This allows healthcare organizations to remain compliant with ever-changing threats and associated regulations.

Ongoing Updates and Support: Regular updates and relentless support from the TrueFort team ensure that healthcare entities always have the best tools and insights for HIPAA compliance.

In a world where compliance with regulations like HIPAA is non-negotiable, the TrueFort Platform offers best-in-class support. By offering real-time monitoring, risk mitigation, and continuous improvement, TrueFort is more than just a platform – it's a partnership in ensuring the highest standard of patient data protection.

Empower your organization with the TrueFort® Platform and take a decisive step towards an unwavering commitment to HIPAA compliance.

▶ According to the U.S. Department of Health and Human Services, the **337** healthcare incidents reported affected **19,992,810** individuals.

▶ Healthcare data breaches have **doubled** in the last three years.

Medical Device Protection

The collaboration between TrueFort and Armis enhances customer capabilities, refining the process of discovering, comprehending, and implementing security policies within operational technology (OT) environments.

• **Discover:** Utilizing both agent and agentless technology, this collaboration enables the swift identification of all connected assets within the network. This includes applications, devices, service accounts, and infrastructure, all typically identified within a single day.

• **Understand:** By mapping device behavior to specific applications and establishing a baseline for normal operations, users are endowed with the confidence to discern what to block, disable, or terminate. This comprehension forms the cornerstone of a secure and optimized OT environment.

• **Enforce:** Enforcement is achieved either through specific account and action protocols or by leveraging host firewalls with TrueFort or existing Endpoint Detection and Response (EDR) agents. This rigorous enforcement mechanism ensures a comprehensive and resilient security posture, tailored to the individual needs of the organization.

Through this synergy, TrueFort provides a streamlined and robust framework that offers an unprecedented level of control and insight over OT environments, aligning discovery, understanding, and enforcement for the unique security needs of healthcare.

"Nobody, and I mean NOBODY, else is doing this."

ABOUT TRUEFORT

TrueFort® Platform puts you in control of lateral movement across the data center and cloud. The TrueFort Cloud extends protection beyond network activity by shutting down the abuse of service accounts. Founded by former IT executives from Bank of America and Goldman Sachs, leading global enterprises trust TrueFort to deliver unmatched application environment discovery and microsegmentation for accounts and activity.
