TrueFort Platform: Protecting the Legal Sector
Crucial Cybersecurity Assurance for the Legal Sector

Addressing Cyber Challenges in the Legal Sector

► **Data Breaches and Client Confidentiality:** The TrueFort Platform fortifies the protection of client confidentiality by securing applications that handle sensitive information. Its ability to detect anomalies aids in the early identification of potential breaches, responding instantly and flagging any deviation in approved and expected behavior.

► **Insider Threats:** TrueFort reduces risks from insider threats through strict access controls and monitoring for unusual application-level activities to maintain the confidentiality and integrity of sensitive client information, uphold ethical and legal obligations, and safeguard reputation where trust and discretion are paramount.

► **Ransomware Prevention:** TrueFort Platform minimizes outages and downtime by preventing ransomware spread, thereby reducing the effort of backups and the size of ransoms by limiting the blast radius of any security incident. By leveraging TrueFort's holistic visibility, it is possible to identify previously unnoticed vulnerabilities and take proactive steps to seal those gaps.

► **Encryption and Access Controls Solution:** With robust access controls, TrueFort ensures that only authorized personnel can access sensitive information—preserving client confidentiality and smoothing the path to regulatory compliance.

► **Segmentation of Data:** Using microsegmentation to create secure environments at a granular level, TrueFort Platform isolates client data from other networks within the organization.

► **48%** of security breaches occurred at the application layer, making it the most commonly identified attack vector.

(Forrester)

► In the past year, **76%** of organizations experienced a security incident due to a lack of clear application visibility.

Real-Time Monitoring and Incident Response:
TrueFort offers continuous monitoring for unusual or unauthorized activities and swift incident response to mitigate potential unauthorized disclosures.

Incident Forensics:
Assisting in forensic investigations post-incident, TrueFort Platform helps to determine the cause and extent of any security issue, making future cybersecurity planning more effective and strategic.

Managing Compliance and Ethical Obligations:
TrueFort aligns with ABA Model Rules, ensuring ‘reasonable efforts’ are taken to prevent unauthorized disclosure or access to client information. Also, we support many clients who must match their own clients’ level of security, such as the Defense Cyber Protection Partnership (DCPP), meaning they are regulated at the highest level.

Compliance Reporting

Audit Trails: TrueFort Reporter, an out-of-the-box benefit of the TrueFort Platform, ensures comprehensive logging and enterprise-level reporting for audit trails and compliance reports.

Documentation for Compliance: TrueFort Platform adoption clearly demonstrates an organization’s commitment to protecting client data and adhering to ABA Model Rules and other regulatory requirements.

Security During Mergers and Divestitures

Seamless Transition: The TrueFort Platform aids in the smooth transition of IT systems, maintaining security coverage.

Network Security During Integration: TrueFort ensures security during the integration of IT infrastructures in mergers by continuously monitoring for anomalies and unauthorized activities, keeping the risk from one company from reaching another, and safeguarding the integrity and confidentiality of sensitive data throughout the transition process. TrueFort’s microsegmentation capabilities contain any potentially crippling ransomware attack before it spreads.

Adaptive Security for Evolving IT Environments:
TrueFort Platform adapts to changing IT environments, ensuring resilient and robust security throughout transition.

Protecting Reputation: TrueFort helps maintain a proactive security stance, essential for protecting a law firm’s reputation.

Managing Third-Party Risks
The TrueFort Platform limits incidents by continuously monitoring application interactions and workload behaviors, in real-time.

Support for Diverse Environments
TrueFort offers comprehensive security insights across cloud, data center, and hybrid environments, crucial for both legacy and modern IT infrastructures.
What Makes the TrueFort Platform Different?

- **Compatibility with Existing Security Agents:** TrueFort can streamline implementation and minimize resource usage by leveraging existing EDR agents from SentinelOne and CrowdStrike Falcon.

- **Process Termination Capabilities:** TrueFort offers the unique ability to terminate malicious processes, greatly enhancing defense.

- **CIS Benchmarking:** Ensures continuous protection against misconfigurations and exposures.

- **Machine Learning-Driven Behavior Analytics:** Offer the benefit of advanced, predictive insights into workload behaviors, TrueFort enhances the ability to swiftly detect and respond to anomalies and potential security threats, bolstering the overall cybersecurity posture.

- **Extended Lateral Movement Protection:** With superior protection against lateral movement, TrueFort stops any attackers from moving within networks. This protects critical service accounts, stopping east-west traffic in its tracks.

- **Comprehensive Enterprise Reporting:** Crucial for compliance, threat hunting, and business continuity verification, TrueFort's reporting capabilities can be tuned to fit the needs of an organization's specific requirements.

TrueFort is a vital cybersecurity partner for the legal sector. Its tailored solutions address the unique challenges faced by law firms and legal entities, ensuring the confidentiality and integrity of sensitive client information and maintaining compliance with regulatory standards. This comprehensive approach is integral to safeguarding the legal sector from the ever-evolving landscape of cyber threats.

“We need to get this installed everywhere, right away!”
